Quantity discount for 6 tapes or more by quotation	CALL
Express Turnaround Subject to Availability	CALL

MP3 and MP4 files need to go onto a USB stick unless you prefer to download them. We are happy for you to provide your own USB storage device or we can supply one with your order at a reasonable rate

A standard 16GB USB holds up to around 6 hours of video and costs around £8.00 at the time of writing. USB memory stick prices fluctuate so please ask for current prices when ordering.

All prices are on a per-tape basis and are for a direct copy with no editing. Compilation DVDs of up to 2 hours maximum duration can be made from multiple tapes. Compilation discs are chargeable on a per tape basis at the above rates.

Most smaller orders are completed within 10 working days. If your order is for more than 10 tapes or it is time-sensitive, then please contact us to discuss the current estimated turnaround time before going ahead. Christmas order cut-off date is usually in early December – see website or phone us for details.

Prices shown are for domestic, non-commercial home video tape and memory card transfers. Professional and broadcast video tape and file format pricing available by quotation.
